REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 11-22 are allowable over the prior art because the prior art does not disclose or suggest: computing a shift amount of sampling points based on a spurious spectrum generated by a displacement between a first probe position and a second probe position and measuring a distribution of an electric field or a magnetic field by calculating the second probe position based on the shift amount and position information of the probe, and using the calculated second probe position as an actual position of a sampling point.

Claims 23 and 24 are allowable over the prior art because the prior art does not disclose or suggest: a data processing unit for computing a shift amount of sampling points generated by a displacement between a first probe position stored in a storing unit, the storing unit storing data of an electric field or a magnetic field, as the position data of the probe and a second probe position defined by a timing of an actual measurement at a sampling point and a computing unit for computing a spatial distribution of the electric field or the magnetic field detected by the probe by calculating the second probe position based on the shift amount and the first probe position and using the calculated second position as an actual position of the sampling point.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
